

FILE SUBMISSION CHECKLIST

Before you submit your files for printing

GENERAL	
	Double check your spine size using our spine calculator under the "Authors Tool Kit" section of our website.
	Make sure to embed all fonts and images, or package them up if a source file is being provided. Crops and bleeds must be included on the cover file and any interior pages that require bleed.
	Export your book interior as a single pages PDF, not as two-page spreads.
	Request a print quote from Blitzprint.
	Reply to the quote with the amount of books you would like produced. If you have requested multiple quotes, please indicate the quote number associated with the order.
	Double check the ISBN appears both on the copyright page and the bottom right-hand corner of the back cover and that the font size is between 9 and 12 points.
	Upload all your files through Blitzprint's website and notify your Blitzprint Client Support Specialist once you have done so.
IMAGE PREPARATION Images include all non-textual elements in your book, such as photographs, drawings, charts and tables.	
	All digital images are being submitted in TIFF (.tif), PDF (.pdf) or JPEG format (.jpg or .jpeg) using the maximum quality setting. Your image resolution should be a minimum of 300 DPI to ensure maximum image quality.
	All colour images (book cover and interior) are saved in the CMYK colour space/mode. (Note: Blitzprint can convert RGB colour images to CMYK prior to printing; however, colour shifts may occur, and additional charges may apply.)
	Make sure all images are embedded electronically or packaged up correctly if a source file is being submitted.
OPTIONS	
	Let your Blitzprint Client Support Specialist know if you would like a hard copy proof.
	Clearly indicate to Blitzprint if an ISBN barcode is required.
	Contact your Support Specialist if you require formatting assistance or other additional services.
